

PR AND OUTREACH STRATEGY

TECHCEPTION

-Poshitha S (CSE, 2nd Year)

Before creating an outreach strategy, I first wanted to collect data to understand the concept of the event so that we could plan accordingly.

PREMISE:

Techception is a sprint-style technical treasure hunt event under Titanium 2026 hosted by INOVX at Rajalakshmi Engineering College.

EVENT FORMAT:

3-4 members per team

Entry fee: Rs 200/-

Prize pool: Rs 20,000/-

Consists of three rounds, followed by evaluation of the final product.

ON- CAMPUS STRATEGY:

In REC, the usual way of getting to know about an event/getting people to register (which isn't online) is through:

- Class-to-class campaigns
- Posters across the campus
- Digital posters in food kiosks

The goal is to utilize these techniques in the best way possible.

Few of my suggestions/strategy would be:

1. High impact pitch used for the class campaigns which covers all the key aspects of the event, highlighting on the prize pool and the experience/exposure that can be gained while participating in this event.
2. Strategic poster placement is also helpful. Placing posters in crowded areas, canteens, waiting spots or seating areas. The poster itself should be minimal, with emphasis on the technical treasure hunt aspect and the prize pool, along with a large QR code which directs to the registration link.
3. A catchy digital poster with the same details as above in food kiosks in the campus eateries.
4. Getting contacts of students from every class to forward Registration links through the class groups would also be helpful.

It is also important to reach to the technical departments of our college like, CSE, IT, ECE, AIDS for more eager participation.

I was able to formulate this on-campus outreach strategy because of my prior experience in class-to-class campaigning. I feel that these suggestions would help the club to reach out to willing participants and bring attention to the event itself.

If both offline and online outreach strategy is done in coordination, it would also help us to gain attention to the future events conducted by the InovX club.

THANK YOU
